Measuring your ring size the easy way

1. Use a piece of string or thread and wrap it around the finger that you want to measure.

2. Make sure the string wraps completely around your finger.

3. Do not wrap the thread too tightly or loosely around your finger.

4. Unwrap the thread and use the chart below to find the size of your ring.

5. If the length of the thread falls between 2 sizes then look for a ring in the bigger size.

6. The circumference of the ring should be the length of your string.
